

PRIVATE TRANSPARENCY REPORT

2023

AGEAS Pensões

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The private Transparency Reports, which are produced using signatories' reported information, support signatories to have internal discussions about their practices. Signatories can also choose to make these available to clients, beneficiaries, and other stakeholders.

This private Transparency Report is an export of your responses to the PRI Reporting Framework during the 2023 reporting period. It includes all responses (public and private) to core and plus indicators.

In response to signatory feedback, the PRI has not summarised your responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options that you selected are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

We are an organisation that wishes to offer emotional and relevant experiences to all of our Stakeholders, with a solid financial basis and evolution, and thereby having an active role and impact both on our society and on the Planet. With our current strategy – where the values Care, Dare, Deliver and Share are unbreakable pillars – we are putting sustainability at the centre of our decision-making regarding innovation, understanding risk, foster growth and build a future that must be more inclusive and sustainable. We promote positive actions that may enthral people and thus amplify our impact both on the communities we serve and the Planet. As Investment Managers, we want to be an agent for change as well. We devote part of our resources into Climate Change-linked projects, like promoting the introduction of efficient windows in households, increasing our electric car fleet and encouraging employees' sustainable commuting. We support several social initiatives, including diversity and inclusion actions, solutions to support the ageing population and plans to offer medical insurance to the underprivileged segments of the society. We back the disadvantaged population through donations and patronage, and we promote volunteering activities in which many of our employees participate. Last but not the least, we sponsor Culture as a means for the evolution of a people.

Our engagement in responsible investment stems from our overall approach to sustainability that includes 3 main vectors: contribute to a healthier society (mental health, chronic diseases and ageing), promote climate resilience (reduce our carbon footprint, engage suppliers with responsible practices) and foster inclusion (respect and representativity, accessible solutions and social causes, including treating respectfully employees and Clients alike). To support these 3 long-term ambitions, we set up 6 main corporative objectives:

1. Prepare our workforce for the future
2. Practise responsible Governance and business ethics
3. Implement sustainable and efficient processes
4. Launch Products and Services that correctly answer to social and environmental challenges
5. Have a Responsible Investment in practice

6. Invest in the communities we serve

We wish to contribute to the UN SDG and in Portugal our focus will be in the SDG 3 (Good health and well-being), 5 (Gender Equality), 8 (Decent Work and Economic Growth), 10 (Reduced Inequalities) and 13 (Climate Action).

Our organisation's overall approach to Responsible Investment, and the major responsible investment commitment(s) that we made may be derived from what we internally have established as Global Responsible Investment Process [GRIP] which abides by the following Principles:

I. Exclusion

Portfolio Managers are not allowed to hold in Ageas Portugal managed Portfolios either any asset integrating the so-called Exclusion Lists or that surpasses any prevailing threshold. These Lists constitute comprehensive inventories of all banned Countries or Regions and Companies/Sectors and are periodically updated. The Lists are disclosed to any external manager to whom we may entrust the management of any part of the Portfolio. Ageas Portugal's choice of External Asset Managers should fall on those that embed ESG values and Principles in their responsible investment process and preferably, that are PRI signatories (or PRB in the case of Banks).

II. ESG Integration

We assess the ESG quality of every potential investment, monitoring its evolution thereafter, should the purchase have been carried out. The asset can only be purchased if its ESG Risk rating does not go beyond a certain threshold. In the case of Funds, we favour those that are qualified as Art.8 or Art.9 under SFDR.

III. Engagement

We should get involved with the firms we invest in, either through voting or engagement per se. However, this Engagement may also be materialised via rendered services by specialised entities. Ageas currently subscribes Columbia Threadneedle's Responsible Engagement Overlay [reo®] for Assets under review. A quarterly Report is produced, containing all ESG issues that have implied engagement and monitoring actions. For domestic companies, a local due diligence and engagement is performed and voting carried out.

The evaluation is performed monthly and a report with a list of all investments that have been made with the corresponding ESG evaluation is made in order to: 1. Monitor eventual violations to the rule and subsequent remedial courses of action; 2. Have a measure of the ESG Risk that is being added to the portfolio; 3. Integrate the information into the Portfolio ESG Risk Rating Analysis performed monthly and presented to the Monitoring and Control Meeting and to the ALM & Investment Committee.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Regarding Responsible Investment, there were three main achievements worthy of notice during the reporting year:

1. We set up our Carbon Measurement Framework within the investments and started measuring Scopes 1, 2 and 3 Carbon Emissions as well as Carbon Intensity.
2. By subscribing to another data supplier, we managed to enlarge the coverage of the measured percentage of our Portfolio that reaches now almost 90%.
3. We started the negotiations to enlarge the scope of our investments considered under the Engagement performed by our external provider.

Besides the above-mentioned achievements, there was a more detailed specification regarding the entities to be excluded from our investments and a refinement of the limits to be considered in terms of the ESG Risk Rating. Additionally, we collaborated with the national and European supervising authorities on:

- Initiatives on OPSG (Occupational Pensions Stakeholders Group) at EIOPA
- Through APFIPP – that afterwards purported the conclusions to Pensions Europe and EFAMA – we engaged in working groups for various topics (e.g., ESG Funds' designation)

In what regards Collaborative Engagements, Ageas Portugal – which Ageas Pensões is part of – belongs to several Organisations engaged in sustainability, like:

- APEE (Associação Portuguesa de Ética Empresarial – Portuguese Association for Business Ethics)
- APPDI (Associação Portuguesa para a Diversidade e Inclusão – Portuguese Association for Diversity and Inclusion)
- BCSD (Business Council for Sustainable Development) Portugal
- EVPA (European Venture Philanthropy Association), through the Ageas Foundation which is a member since 2016
- GRACE – Responsible Companies, since 2023 (but the Ageas Foundation is a member since 2019)
- United Nations Global Compact (UNGC), since 2020

Besides the UN PRI, Ageas Portugal subscribed the following:

- 2019
 - o Agreement on the inclusion of people with disabilities within the Inclusive Community Forum (ICF)
 - o Business Mobility Pact for the City of Lisbon (BCSD)
- 2020
 - o Portuguese Charter in favour of Diversity, within APPDI
 - o Commitment to the Lisbon European Green Capital Award
 - o BCSD Portugal's Manifesto 'Companies for Sustainability'
- 2021
 - o BCSD Portugal's 'Towards COP26'
 - o Manifesto 'Innovation, economic development and sustainability' within the Strategic Council for the National Sustainability Award
- 2022
 - o UN Sustainable Ocean Principles
 - o BCSD Portugal's 'Towards COP27'

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Among other, we decided to embark on the following projects:

1. Outline a GRIP with more restrictive guidelines both on the Exclusion Principle and on the Integration of ESG Factors which will come into force throughout 2023.
2. Refine our Carbon Framework and get data from a more reliable supplier.
3. Increase our amount of sustainable investments.
4. Have 100% transparency in relation to investments, i.e., every investment must be scrutinised in terms of its sustainability features.
5. Have least 25% of all new production invested into sustainable investments.
6. Monitor our Portfolio in terms of carbon emissions with the aim at attaining a 50% reduction (on a December 2021 basis) by 2030.
7. Definition and implementation the new social responsibility strategy of Grupo Ageas Portugal.

8. Integrate ESG criteria into the supplier qualification and evaluation process.
9. Stratification and hierarchy of Suppliers to ensure that those who have more weight in our procurement policy will also have a greater demand for compliance with sustainability criteria.
10. Within our Beautiful Business Area – whose first strategic initiative, entitled 'Moving with Uncertainty' comprised an inspiring lecture together with a creative dancing performance, that fostered new looks on leadership challenges – we plan to continue with the 'Leadership Circles', the Development of strategic actions for the entire Organisation and the implementation of a programme to develop the human potential of our Teams.
11. In the field of Health, our goal is to train more employees in the use of AED (Automated External Defibrillator) and following our Mad@Work Project – whereby we tested a tool designed to detect and prevent early symptoms of mental health problems in the workplace – we will pursue with the implementation of the 'Pact for Mental Health in the Workplace' and follow with the 'Mental Health First Aid'. Health literacy initiatives will be carried out as well.
12. We will promote the MaisIdadeMais Project to support the ageing population and partner in literacy projects.
13. Expand the distribution of a protection solution (Forte) for older Customers.
14. Endeavour transparency in the communications with our Customers.
15. Launch of easy-to-add insurance for companies with lower financial strength.
16. Introduce the PEPP, the new pan-European Personal Pension Product.
17. Launch the 'Theatre from/to all' Ageas Accessibility Project with D. Maria II National Theatre.
18. Start a social inclusion project through Art at a Lisbon neglected neighbourhood.

- (A) Yes, we use responsible investment KPIs to evaluate the performance of our board members, trustees, or equivalent

Describe: (Voluntary)

According to our Responsible Investment Policy, Ageas Pensões "integrates the existing sustainability risks in its Remuneration Policy. The central importance of the Remuneration Policy presupposes, in turn, a system of governance which ensures the effective application of best practices in this area. For this reason, Ageas Portugal includes environmental, social and governance issues, proportional to the type of activity carried out, in the relevant performance objectives for the purposes of awarding variable remuneration." Ageas Pensões "is aware that the Remuneration Policy represents a central instrument for aligning interests and that it is necessary that it takes into consideration the objectives of sustainable investment, aligned with the interests of Clients, and simultaneously capable of ensuring conditions for the implementation of fair remuneration that is capable of attracting, retaining and motivating its Managers and Employees".

Ageas Pensões "has adopted a clear strategy to identify ESG metrics that are relevant to its business and are compatible with its long-term business interest and vision, as well as with responsible investment. In identifying the key ESG metrics to associate with compensation, Ageas Portugal performs a weighting of objectives that ensure balance, diversity and relevance, making a significant component of variable compensation dependent on the achievement of rigorous and challenging objectives, with a view to ensuring an incentive for superior performance. Ageas Portugal is aware that there is a risk of non-compliance with ESG duties if the variable component of remuneration consists predominantly of remuneration paid without deferral or ex-post risk adjustment mechanism or if a formula is used that links variable remuneration to current year revenues rather than risk-adjusted earnings. Therefore, the measurement of performance used to calculate the variable component of remuneration includes adjustments considering, among others, the various types of current and future ESG risks, and for this purpose Reduction adjustments ("Malus") are included in the Remuneration Policy.

The Remuneration Policy contemplates remuneration structures that optimise financial results and promote sustainable behaviour without generating or exacerbating systemic risks that may undermine long-term investment interests. By applying mechanisms that allow for changes in the remuneration structure, Ageas Portugal ensures that appropriate incentives are in place to take precautions and to mitigate risks. Bearing in mind the importance of there being a balance between metrics that aims to reduce exposure to risk and those that promote sustainable growth, Ageas Portugal includes in its Remuneration Policy factors that mitigate risk, as well as objectives that aim to encourage business development."

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

(A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Our standard planning horizon is the fiscal year and within this horizon we adamantly exclude sectors or Companies involved in, e.g., thermal coal mining. In what concerns ESG integration, we set strict metrics regarding Green Bonds – as well as Social, Sustainable and Sustainability-linked Bonds – that have, during the fiscal year, to reach a minimum defined threshold.

(B) Yes, beyond our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Within our Responsible Investment Policy, we have considered several exclusions, e.g., thermal coal industries, and thresholds in terms of ESG scores for our investments, in addition, we set up carbon emissions decrease for two different horizons, firstly the 2030 horizon - reducing our Portfolio's GHG emissions in 50%, considering a December 2021 basis - and then the 2050 one, for which the aim is to reach a carbon net-zero emissions target.

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

● (A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Ageas Pensões is 100% owned by Ageas Portugal which is, on its turn, part of Ageas NV Group. As such, and besides internal policies and regulations, Ageas Pensões follows the guidelines set up within the current IMPACT24 strategy that was launched in June 2021. This strategy puts climate change in the centre of our concerns both in the Products we sell and in our investments.

Our overall IMPACT24 strategy has 4 main KPI objectives for Investments and Products:

1. Sustainable Investments – Achieve at least EUR 10 Billion in investments that make a positive contribution to the transition towards a more sustainable world by 2024.
2. Transparency – ESG considered in 100% of our investment decisions by 2024.
3. Net-Zero Emissions – Following the European Green Deal targets, our aim is to reach carbon net-zero emissions by 2050.
4. GWP 25% – The goal is to have at least 25% of the Gross Written Premia invested in sustainable investments.

In what regards Investments, we have set up our GRIP that we continuously finetune and ameliorate, particularly in what concerns climate related aspects but overall integrating ESG factors and transparency in the investment decisions.

As to Products, during the reporting year, we set up the framework with the aim at launching ESG Funds/Products which we have materialised during the current year.

(1) Describe your process

The Climate Change analysis comprises two different parts:

- Long-term quantitative analysis - The Climate Biennial Exploratory Scenario (CBES) served as inspiration to perform asset stress-tests due to transition risks, considering type of investment and sector allocation. Three different policy scenarios were considered - Early action, Late action and No additional action;
- Analysis on insurance liabilities - With a particular focus on physical risk, assessing how insurance liabilities might be impacted by different perils, such as, flood, storm, wildfire, subsidence, hail, drought and heatwaves.
