The purpose of the **reo**® (responsible engagement overlay)\* service is to engage with companies held in portfolios with a view to promoting the adoption of better environmental, social and governance (ESG) practices. The **reo**® approach focuses on enhancing long-term investment performance by making companies more commercially successful through safer, cleaner, and more accountable operations that are better positioned to deal with ESG risks and opportunities. Through a combination of constructive dialogue and active share voting, **reo**® works to drive behavioural change with companies, and records successful outcomes as 'milestones' – changes in corporate policies or behaviour following intervention.
